CORE FUNDAMENTALS COURSE

DESCRIPTION

The Core Fundamentals course is intended for personnel responsible for day-to-day administration and management of Commvault® Simpana® software. The course covers essential concepts, details, options, and best practices for user security and management, system settings, policy configuration and use, media and library management, job activity and status monitoring, and job management. Students also learn how to efficiently and effectively manage data movement (backup, archive, auxiliary copy, and restore) within a CommCell® group.

PREREQUISITES

- Introduction to Simpana® software eLearning course must be completed before attending the Core Fundamentals course.

DELIVERY METHODS

- This course is available as a three day Instructor-led or Virtual Instructor-led training program delivered as a public class or as private onsite training.
- This course is available as a six course eLearning bundle.

CORE FUNDAMENTALS CERTIFICATION EXAM

The Simpana® Core Fundamentals Certification Exam assesses the candidate's level of comprehension for:

- Basic user and system administration tasks for secure data management.
- Configuration and management of storage policies, data retention, and protection options for protecting data.
- Configuration and role of agents, data sets, and subclients in defining protected data requirements.
- Understanding data movement and storage options with various types of libraries and media.
- Scheduling, executing, and managing jobs for protecting and recovering data.
- Management of media both inside and outside of libraries.
- Options for restoration and recovery of data, systems, and applications.
- Monitoring, reporting, and alerting on system events.

CERTIFICATION EXAM SPECIFICS

- Total Questions: 40
- Time Allotment: 90 Minutes
- Passing Grade: 75% (30 correct answers)
