

## V11 ADVANCED NEW FEATURES

### DESCRIPTION

Explore the exciting feature enhancements and additions to the next generation of Commvault® software. Learn about product changes and configuration options before upgrading your Commvault environment to the latest Service Pack. This course focuses on feature changes including: security, indexing, deduplication, storage policies, and virtualization.

This course is most appropriate for those who already hold the Version 11 Professional and Engineer Certification, looking to refresh skills related to SP4 thru SP9. This course includes the Commvault V11 Walkthrough supplemental guide and access to the V11 CVLab environment (labs will be conducted during the class).

#### Prerequisites

Commvault® Professional class or the Core Fundamentals and Implementation and Maintenance classes should be taken prior to participating in this class.

### WHO SHOULD ATTEND THIS COURSE?

This course is intended for experienced Commvault® administrators looking to learn about new V11 features, up to Service Pack 9, and prepare for V11 upgrade exams.

### CERTIFICATION

Completion of this course helps you prepare for the **Commvault Certified Professional Certification**. The **V11 Advanced New Features** exam is included free of charge as a part of the **V11 Advanced New Features** instructor and virtual instructor-led course registration.

## Commvault Certified Professional Update Exam (2018)

The Commvault® V11 update exam assesses the candidate's level of comprehension for:

- Configuring and administering Commvault® software using the Admin Console
