

# Commvault Essentials

## Description

Discover the fundamental concepts of how to successfully manage Commvault® software. This 1-day course presents operational functions related to the Commvault Command Center™ and presents its integrated product solutions such as: Commvault Complete Backup and Recovery™, Commvault Activate™, and Commvault Orchestrate™. Designed for users who are new to Commvault software, this course presents how to:

- Install Commvault software, set up the Commvault Command Center™, and configure its broad range of products and features.
- Implement security for users, roles, and entities.
- Understand common backup storage location concepts and configuration, monitor the CommCell® environment, and review data protection plan design.
- Manage servers, server groups, and agents, and protect applications, databases, and instances running in the cloud.

Each lesson builds on previous topics so you gain a strong understanding of Commvault software. This course does not include hands-on labs or certification.

## Prerequisites

It is recommended that you watch the [Welcome to Commvault® e-Learning](#) course. This course is included at no additional cost, as a part of your class registration, and is recommended to be completed prior to attending this course.

## Who should attend this course?

This course is intended for operations and administration personnel who are new to Commvault software and responsible for day-to-day administration and management operations.

## Delivery Methods

- Virtual Instructor-led

## Highlights

### Product Release

- Commvault Version 11

### Delivery Methods

- Virtual Instructor-led

### Duration

- One day Virtual Instructor-led

## Course Modules And Self-Paced Training Courses
